

To Whom It May Concern,

PLEASE keep Weather & Traffic on XM Radio. Since I have been a subscriber to XM Service I have always said the only thing that can make this better is to have a Traffic & Weather Channel. And they so recently started this kind of service!

As a Sales Vendor for the Bay Area, I spend at least 4 hours a day driving to and from home and different stores in my service area. Therefore I listen to my XM radio during that time, and find it invaluable to have Traffic whenever I want it at a touch of a button. Instead of having to wait for the radio stations to broadcast it only during "Rush Hour" times! Which is useless, because I know at "Rush Hour" time which way to go and not to go. It's during the day when I need it, and I can always count on XM Radio to bring it to me!

PLEASE KEEP WEATHER & TRAFFIC ON XM RADIO!
